Outpace Attackers & Strengthen Resilience

Continuous Threat Exposure Management

Discover, Validate & Prioritize External Threats Before They're Exploited

As attack surfaces continue to grow, traditional security measures only go so far. Stratascale's Continuous Threat Exposure Management (CTEM) service provides a proactive approach to discovering, validating, and prioritizing vulnerabilities across your external attack surface—helping you minimize your threat exposure.

We combine cutting-edge security tools, threat-based intelligence, and human oversight to execute simulated cyberattacks against your networks, systems, and assets to identify and address vulnerabilities before they can be exploited. By adopting an attacker's mindset, we help you outpace modern adversaries and create robust defense against evolving threats.

Human-Led Validation & Business-Aligned Objectives

We combine expert-led testing with human validation to deliver focused results. Every finding is verified by our offensive security professionals, reducing false positives and providing actionable remediation guidance that reduces the burden on your security teams. And unlike traditional external risk scanners, we align our validation and testing to your broader business strategy and priorities-empowering you to focus where it matters.

Attack Surface Discovery

We perform continuous mapping and assessment of your digital footprint to identify potential entry points and security gaps. empowering you to focus where it matters most.

Communication & Collaboration

We can conduct interactive demonstrations of validated vulnerabilities to your security team, showcasing exploitation techniques and attack chains.

Reporting & Documentation

Through comprehensive reporting and real-time risk intelligence, we help facilitate informed decision-making.

Continuous Threat Validation

We ensure all threats are validated, prioritized, and tested for exploitability to determine real-world risk.

Know Your Attack Surface, Control Your Risk

Stratascale's CTEM service gives you the visibility, validation, and prioritization you need to stay ahead of today's rapidly evolving threat landscape. By aligning to business objectives and continuously validating real-world risks, CTEM empowers you to make confident, informed decisions about your organization's security. Protect what matters most—before attackers have the chance to strike.
