

Stay Ahead of Threats with Proactive Vulnerability Protection

Vulnerability Management as a Service

Strengthen Security with Intelligence-Driven VMaaS

Continuous, proactive vulnerability management protects applications, systems, and networks from cyber threats. Yet, the complexity and volume of remediation efforts can strain internal teams.

Stratascale's Vulnerability Management as a Service (VMaaS) takes the strain off your team by offering a risk-based approach to identifying, prioritizing, and remediating security risks. Our experts leverage threat intelligence to help you stay ahead of emerging threats and maintain compliance.

- 1 Asset Discovery & Inventory**
Continuous monitoring and scanning to discover new and/or rogue assets and provide full visibility into your environment
- 2 Vulnerability Scanning**
Regularly scheduled internal and external scanning to identify vulnerabilities in systems, applications, and networks across your environment
- 3 Baseline Scanning**
Baseline scanning using supported industry frameworks like NIST, guided by industry best practices and recommendations for control implementation
- 4 Risk Prioritization**
Rapid vulnerability prioritization leveraging threat intelligence and business context to assess impact and the likelihood of exploitation, quickly securing vital assets and avoiding zero-days
- 5 Remediation Guidance & Support**
Support from dedicated security practitioners to address identified vulnerabilities, guide patching efforts, as well as validate and verify successful remediation efforts
- 6 Reporting & Metrics**
Real-time insights on vulnerability status, trends, and remediation efforts to measure improvement and communicate overall business risk to key stakeholders

A Smarter Approach to Vulnerability Management

Stratascale's VMaaS goes beyond basic scanning, leveraging real-world threat intelligence to prioritize the most critical risks to reduce complexity and manual efforts.

Unlike traditional vulnerability management programs, our service includes continuous monitoring, in-depth reporting, and hands-on remediation guidance — helping you reduce risk exposure and stay ahead of cyber threats and compliance mandates.

Transform Vulnerability Management into a Proactive Program

Partner with Stratascale to continuously manage, measure, and reduce your cyber risk by closing your exposure gap.
